# It's Never Too Late!

**The Suicide Prevention Program at the Detroit Veterans Affairs Medical Center is seeking assistance from the faith based community in raising awareness of Veteran suicide. We will help train pastoral staff, volunteers, and family members in recognizing the warning signs and symptoms of suicide.**

**Would you consider being a HUB for Suicide Prevention in your community? A church HUB will:**

- 1.** Promote and organize a Veteran suicide prevention training for pastoral staff, volunteers, and family members in your area.
- 2.** Provide a list of mental health resources for church members
- 3.** Consider starting an outreach to Veterans in your congregation.
- 4.** Post the Veterans Crisis Line link on your web page.
